

Critical Information Summary

Residential Plan – 24 Month Contract

Information about the Service

The KernWi-Fi Residential wireless broadband service delivers a reliable high-speed fixed wireless internet connection to locations across South Australia using our wireless network without requiring a conventional phone line.

The service will be provisioned to deliver the 'plan' selected download speed and the upload speed, within the Kern Network. You will not be able to achieve this maximum speed all of the time.

Actual speeds will vary online due to internet traffic, servers, locations and routers and is not within the control of Kern.

The average customer connection speed during non-peak times is between 10-12 Mbit. The average customer connection speed during peak times is 8-12 Mbit for 12/2 service.

The average customer connection speed during non-peak times is between 10-25 Mbit. The average customer connection speed during peak times is 8-18 Mbit for 25/5 service.

Important qualifications: Line Of Sight (LOS) to one of our transmission towers is required.

Requirements and Availability

KernWi-Fi wireless broadband services is subject to service qualification which includes confirming line of sight to one of our transmission towers in South Australia. To supply the service, we need to install an external wireless antenna on your premises in a suitable location which has line of sight to one of our towers.

To check availability of the service, please complete a sign-up form for your desired plan and we will contact you shortly after to advise availability at your location.
